

RECOVERY KIT

The **Recovery Kit** features a purpose-built mine spec tandem trailer that comes complete with the Soft Rigging Solutions lightweight recovery equipment. This equipment is made out of Dyneema, which is 15 times lighter than its equivalent steel.

The Recovery Kit is ready for immediate deployment, whether it be an emergency, breakdown or a bogged machine needing recovery. Having all the recovery gear conveniently housed within the trailer ensures that valuable time isn't wasted due to being unable to locate the items required across the various departments that use them.

Some mine sites in the Bowen basin have moved to have an extra recovery kit dedicated only to emergencies as part of their ERT kit due to learnings from previous incidents.

INCLUDED

1 x mine spec Tandem Trailer

2 x 15m Magni Slings

2 x Orion Shackles

2 x Poseidon Shackles.

Option to customise inclusions.

The products included in the kit enable you to hook two dozers up to an RD that, for example, has gone through a bund or hook the two slings together to form a 30-meter sling.

WHY RECOVER KIT?

- All required equipment in one place
- Quick response times to bogged equipment or emergency situations
- Can mix and match gear included
- Arrives on-site, full mine spec, chocks, all-terrain tires, high vis, trailer ID etc
- Fully enclosed in the Premium trailer or Box trailer with waterproof tonneau cover
